This judgement is a farce. Complete idiocy. Bad Microsoft! We order you to establish yourself in a market you do not already own and in fact one of your most dreaded competitors DOES own as a PUNISHMENT. Oh yeah I m sure MS is cryin in their beer here. APPLE is the WELL KNOWN dominant educational platform and the judgement all but hands it to them on a silverplatter by REQUIRING THEM to become active in it s makeup. PUNISHMENT would be the m having to SUPPORT the ecucational systme by BUYING APPLES to put in schools. Is this justice? Hell no. It says long live monoploies becasue you ve just insured to get more of the same. More MS dominating every market and NOW the educational market as well wow some punishment. Good job buckwheat. Hope you can salvage your soul from hell. Yay america. I sure hope the same jdges don t decide the terrorist s fates because they ll be sent to Club Med with explosives.
